gen_pl_pro is shell tool for creating Perl project.

Developed in `bash` code: **100%**.

The README is used to introduce the tool and provide instructions on how to install the tool, any machine dependencies it may have and any other information that should be provided before the tool is installed.

CHAPTER 1

Installation

The image shows a terminal window with a dark background and a light-colored ASCII art logo on the left. The logo is composed of various characters like '\$', 'Y', and 'b' arranged in a stylized shape. On the right side of the terminal, system information is displayed in a light green font. At the bottom of the terminal, there is a color calibration bar with several colored squares.
